

In Regard to the NAB Petition 04-160:

I support Satellite radio. I chose to pay for this service because I can actually choose what programing I can listen too. Sure, on free airwaves I can choose the station, but I am subject to having to listen to solicitation, as well as disc jockeys who are allowed to use their 1st amendment rights and say what they please.

I do not feel that the FCC/Congress should squash Satellite radio ability to provide traffice and weather reporting since it is available thru a wide offering such as internet etc.. The NAB do not control the weather nor do they control traffice..how can they think only they should have the right to report it???? Maybe if the NAB did a better job controlling the mouths of their DJ's, and worried more about consumer and listener satisfaction and not their fat pockets, then they would not be losing their audience.

BELEIVE IT OR NOT, some of us still care about what comes out of other peoples mouths...some of us realize now to be entertained and informed without being insulted.. we are going to have to pay for it.

Thanks You For Your Time,
Kerri Reed
